## CAVIAR

Caviar is a European White Oak with a light-weathered texture and hand-eased edges. Caviar is a multi-step reactive treatment, creating color by reacting with the oak's tannins, not through a staining process. This espresso-toned floor possesses a chatoyancy that highlights the patina of the wood. Caviar is finished with our Signature finish.

### 21mm Construction

6mm Lamella

Tongue and Groove  
End Matched

15mm baltic birch plywood  
(21 mm Engineered)

0- VOC | CARB 2 Compliant

Radiant Heat Approved

Matching Tread Blanks & Square Stock Nosing

Made in USA

---

*CHARACTER GRADE*

---

Character Grade is cut closest to the center heart of the tree, providing more characteristics of knots, cracks, and natural graining, giving it an “Old World” flooring feel.

---

*LIGHT CHARACTER*

---

Light Character Grade (often referred to as “PIPPY”) is cut slightly further North and South from the center of the heartwood, resulting in less knotting than the Character Grade. Some flooring boards in this grade may be free of knots but may have occasional sap lines along the edges. This grade can offer a more natural and modern appearance.

---

*SELECT*

---

Select Grade is cut furthest from the center Heartwood. This method allows for the cleanest grade, with only a few eraser-size knots. Unlike the other grades, Select is free from Sap Wood, providing a clean, modern look.
