# Natural Creations

REAL HARDWOOD FLOORS

## VAN DYKE

Van Dyke is a European Oak with a light-weathered texture and hand-eased edge detail. Van Dyke is treated with a Hand Applied Reactive Stain, then hand wiped with a Brown glaze treatment meant to replicate the patina of a 100-year-old preserved and waxed floor. Van Dyke is finished with our Signature Finish.

6mm Lamella

21mm Construction

Tongue and Groove  
End Matched

15mm baltic birch plywood  
(21 mm Engineered)

0- VOC | CARB 2 Compliant

Radiant Heat Approved

Matching Tread Blanks & Square Stock Nosing

Made in USA

---

*CHARACTER GRADE*

---

Character Grade is cut closest to the center heart of the tree, providing more characteristics of knots, cracks, and natural graining, giving it an “Old World” flooring feel.

---

*LIGHT CHARACTER*

---

Light Character Grade (often referred to as “PIPPY”) is cut slightly further North and South from the center of the heartwood, resulting in less knotting than the Character Grade. Some flooring boards in this grade may be free of knots but may have occasional sap lines along the edges. This grade can offer a more natural and modern appearance.

---

*SELECT*

---

Select Grade is cut furthest from the center Heartwood. This method allows for the cleanest grade, with only a few eraser-size knots. Unlike the other grades, Select is free from Sap Wood, providing a clean, modern look.
