VELVET

Velvet is a European Oak with a light-weathered texture and hand-eased edge detail. Velvet is smoked to deepen the undertone of the wood, then treated with a Liming Paste application. This allows the dark undertones to show through around the burl and graining of the wood. Velvet is finished with our Signature Finish.

CHARACTER GRADE

Character Grade is cut closest to the center heart of the tree, providing more characteristics of knots, cracks, and natural graining, giving it an “Old World” flooring feel.

LIGHT CHARACTER

Light Character Grade (often referred to as “PIPPY”) is cut slightly further North and South from the center of the heartwood, resulting in less knotting than the Character Grade. Some flooring boards in this grade may be free of knots but may have occasional sap lines along the edges. This grade can offer a more natural and modern appearance.

SELECT

Select Grade is cut furthest from the center Heartwood. This method allows for the cleanest grade, with only a few eraser-size knots. Unlike the other grades, Select is free from Sap Wood, providing a clean, modern look.
